

ADDISON CENTRAL SCHOOL DISTRICT ASBESTOS IN SCHOOLS PERIODIC NOTICE

The Federal Environment Protection Agency requires that the public, persons employed in, and parents of students attending any school building containing asbestos of a friable (possible crumbling) nature must be notified of its presence and location. Further, the agency requires that inspections be made and that maintenance be performed to eliminate risk.

Inspections were made of all schools in the Addison Central School District in 1979 by the Vermont Department of Health. In those inspections, asbestos was found in the boiler rooms and pipe lagging of the following schools: Bridport, Cornwall, Mary Hogan, Middlebury Union High School, and Weybridge. Asbestos is also found in the floor tiles of the School District, but it is encapsulated in the tile. It presents no hazard unless it is disturbed and crumbles. No risk to inhabitants of the building was indicated as long as adequate maintenance is performed.

New cycles of inspections will be performed periodically. An Asbestos Management Plan for each school has been developed by the State and a copy is available for inspection in each school.
